DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method of increasing the number of M2 receptors in the brain, classified in class 424, subclass 725.
- II. Claims 2-4, drawn to a method for increasing cognitive function, classified in class 424, subclass 725.
- III. Claims 5-8, drawn to a method of treating Parkinson's disease, classified in class 424, subclass 725.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The function of invention I is to increase the number of M2 receptors in the brain. The function of invention II is to increase cognitive function. The function of invention III is to treat Parkinson's disease. These functions are distinct because they each cause a different effect on the body and the patients being treated are not necessarily the same patient.

Because these inventions are distinct for the reasons given above and the search required for one group is not necessarily required for the other groups, restriction for examination purposes as indicated is proper.

Art Unit: 1654

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
